INDEX

Adams, N. A. *See* Loginov, Adams & Zheltovodov

Bhattacharya, P., Manoharan, M. P., Govindarajan, R. & Narasimha, R. The critical Reynolds number of a laminar incompressible mixing layer from minimal composite theory, 105–114

Boersma, B. J. *See* Treurniet, Nieuwstadt & Boersma

Bridges, T. J. & Donaldson, N. M. Secondary criticality of water waves. Part 1. Definition, bifurcation and solitary waves, 381–417

Bridges, T. J. & Donaldson, N. M. Secondary criticality of water waves. Part 2. Unsteadiness and the Benjamin–Feir instability from the viewpoint of hydraulics, 419–439

Colonius, T. *See* Suzuki & Colonius

Corke, T. C. *See* Othman & Corke

Dalziel, S. B. *See* Ross, Dalziel & Linden

Daniels, P. G. Shallow cavity flow in a porous medium driven by differential heating, 441–459

Donaldson, N. M. *See* Bridges & Donaldson

Dormy, E. *See* Gérard-Varet & Dormy

Frankel, I. *See* Manela & Frankel

Gaskell, P. H. *See* Wilson, Summers, Kapur & Gaskell

Gérard-Varet, D. & Dormy, E. Ekman layers near wavy boundaries, 115–134

Govindarajan, R. *See* Bhattacharya, Manoharan, Govindarajan & Narasimha

Graham, M. D. *See* Li, Xi & Graham

Heaton, C. J. & Peake, N. Algebraic and exponential instability of inviscid swirling flow, 279–318

Hu, Z. W. *See* Sandham, Morfey & Hu

Huppert, H. E. *See* Ungarish & Huppert

Juniper, M. P. The effect of confinement on the stability of two-dimensional shear flows, 171–195

Kapur, N. *See* Wilson, Summers, Kapur & Gaskell

Karniadakis, G. E. *See* Wan & Karniadakis

Li, W., Xi, L. & Graham, M. D. Nonlinear travelling waves as a framework for understanding turbulent drag reduction, 353–362

Linden, P. F. *See* Ross, Dalziel & Linden

Loginov, M. S., Adams, N. A. & Zheltovodov, A. A. Large-eddy simulation of shock-wave/turbulent-boundary-layer interaction, 135–169

Manela, A. & Frankel, I. On the Rayleigh–Bénard problem: dominant compressibility effects, 461–475

Manoharan, M. P. *See* Bhattacharya, Manoharan, Govindarajan & Narasimha

Morfey, C. L. *See* Sandham, Morfey & Hu

Narasimha, R. *See* Bhattacharya, Manoharan, Govindarajan & Narasimha

Nieuwstadt, F. T. M. *See* Treurniet, Nieuwstadt & Boersma

Othman, H. & Corke, T. C. Experimental investigation of absolute instability of a rotating-disk boundary layer, 63–94

Peake, N. *See* Heaton & Peake

Ross, A. N., Dalziel, S. B. & Linden, P. F. Axisymmetric gravity currents on a cone, 227–253

Rubinstein, R. *See* Woodruff & Rubinstein

Woodruff, S. L. & Rubinstein, R. Multiple-scale perturbation analysis of slowly evolving turbulence, 95–103

Xi, L. *See* Li, Xi & Graham

Zheltovodov, A. A. *See* Loginov, Adams & Zheltovodov

N. D. Sandham, C. L. Morfey & Z. W. Hu	Nonlinear mechanisms of sound generation in a perturbed parallel jet flow	1
T. C. Treurniet, F. T. M. Nieuwstadt & B. J. Boersma	Direct numerical simulation of homogeneous turbulence in combination with premixed combustion at low Mach number modelled by the *G*-equation	25
H. Othman & T. C. Corke	Experimental investigation of absolute instability of a rotating-disk boundary layer	63
S. L. Woodruff & R. Rubinstein	Multiple-scale perturbation analysis of slowly evolving turbulence	95
P. Bhattacharya, M. P. Manoharan, R. Govindarajan & R. Narasimha	The critical Reynolds number of a laminar incompressible mixing layer from minimal composite theory	105
D. Gérard-Varet & E. Dormy	Ekman layers near wavy boundaries	115
M. S. Loginov, N. A. Adams & A. A. Zheltovodov	Large-eddy simulation of shock-wave/turbulent-boundary-layer interaction	135
M. P. Juniper	The effect of confinement on the stability of two-dimensional shear flows	171
T. Suzuki & T. Colonius	Instability waves in a subsonic round jet detected using a near-field phased microphone array	197
A. N. Ross, S. B. Dalziel & P. F. Linden	Axisymmetric gravity currents on a cone	227
X. Wan & G. E. Karniadakis	Stochastic heat transfer enhancement in a grooved channel	255
C. J. Heaton & N. Peake	Algebraic and exponential instability of inviscid swirling flow	279
M. C. T. Wilson, J. L. Summers, N. Kapur & P. H. Gaskell	Stirring and transport enhancement in a continuously modulated free-surface flow	319
W. Li, L. Xi & M. D. Graham	Nonlinear travelling waves as a framework for understanding turbulent drag reduction	353
M. Ungarish & H. E. Huppert	Energy balances for propagating gravity currents: homogeneous and stratified ambients	363
T. J. Bridges & N. M. Donaldson	Secondary criticality of water waves. Part 1. Definition, bifurcation and solitary waves	381
T. J. Bridges & N. M. Donaldson	Secondary criticality of water waves. Part 2. Unsteadiness and the Benjamin–Feir instability from the viewpoint of hydraulics	419
P. G. Daniels	Shallow cavity flow in a porous medium driven by differential heating	441
A. Manela & I. Frankel	On the Rayleigh–Bénard problem: dominant compressibility effects	461
